

# Survey123 Guide

This guide will help those assigned to the TIFMAS assignments using Survey123 check in app. You need to download the Survey123 app from the Apple App Store or Google Play Store.

Scan QR Code from the Survey 123 application search bar or use device camera to open the check-in form

The first time you scan the QR code the Check-In Form will open and is ready for data entry. On future deployments, go to the main screen in the Survey 123 App and click TFS Incident Check-in or you may just scan the QR Code again.

This gets tricky! Mobilization date is date you leave for assignment. Check in Date is the Date you check in for assignment. If you select a time before noon it will count that day as first work day. If you put a time past noon (12:01pm) it will count the next day as your first work day. This is important as it will calculate demob date based on this.

# REGIONAL FIRE COORDINATORS

The role of the Incident Response Department is to ensure the rapid and effective response of appropriate resources, as needed, to suppress and extinguish wildfires in Texas. Rapid initial response to wildland fires is essential to suppress wildfires during high fire danger conditions, limit losses and provide for the safety of emergency responders and citizens. In addition, TAMFS is often requested to respond to all-hazard incidents that affect the state.
